

Homeschool Support

As former homeschool families ourselves, we recognize your commitment to your home school curriculum. That is why our services are considered “in addition to” support for your child. We want to partner with your family to enhance your at home program. Our expertise is in education, training and curriculum development. We have worked to develop a program that works with the family to assure success in your child’s academic journey.

The Scholar Shop partners with the homeschool family to enhance learning by identifying areas of remediation in the core curriculum and building on areas of enrichment. We help give you as a parent the confidence that your child is building a strong foundation for future learning. Families are offered classes that qualify children to take the ECOT (End Of Course Test) for the high school credit as well as workshops that encompass key skills for academic achievement.

Services to enhance “at home learning”:

- **Individualized plans** based on diagnostic assessments developed to remediate or enrich your child’s learning.
- **Follow up lessons** to take home and reinforce subject content.
- **Parent seminars** to foster exciting ideas for home teaching as well as tools and methods to cope with different learning styles and issues.
- **Workshops** for children to learn important skills such as Public Speaking, Writing Research Papers, Note taking, Organizational and Study Skills.
- **Classes** offered; Algebra I, 9th English Literature, Latin

“Where do I get extra support and practice for my child?”

“How can I give my child reinforcement in core curricula?”

“Where can I find a-la-carte classes that my child can use for credit without committing to additional classes we don’t need?”
