

Student Workshops

Skills for Success

Give your child every advantage by preparing a solid foundation of organizational skills, good note taking and study skills.

We offer workshops that challenge students to hone in on the skills necessary for academic success.

Public Speaking

We believe that confidence in public speaking not only ensures success in the classroom, but is a skill needed for life in general.

There are key points to be learned in presenting ones self that affect every aspect of life from class presentations to job interviews.

Reading and Writing Workshop

Reading Comprehension is key for success. We will help your child develop skills for faster reading and better retention. Using grammar, vocabulary, and basic writing formats, we will also work with your child to improve writing skills.

Internet Safety

Along with the benefits of the World Wide Web and our information based society comes many dangers and concerns. Children today use the web to surf for information on homework help, information for research projects, and of course the social aspect of websites like My Space and Facebook. Let us help communicate safe habits for the web and deliver the warnings in a way that makes sense to our children.

Check our calendar of events for dates, times and other great workshops.
